# Setup Guide

## Mobile Devices

**iOS**

1. Open Settings and tap Wi-Fi.
2. Select “freespot=Security Password(AES)”.
3. Enter “freespot” as the password and tap Join.

Once you are successfully connected to FREESPOT, a web browser will launch automatically.

**Android**

1. Open Settings and tap Wi-Fi.
2. Select “freespot=Security Password(AES)”.
3. Enter “freespot” as the password and tap CONNECT.

## Computers

### Windows 10/8.1

1. Click the Wi-Fi icon on the taskbar.
2. Select “freespot=Security Password(AES)” and click Connect.
3. Enter “freespot” as the network security key and click Next. If the network location wizard appears, click No.

Once you are successfully connected to FREESPOT, a web browser will launch automatically.

### Windows 7

1. Click the Wi-Fi icon on the taskbar.
2. Select “freespot=Security Password(AES)” and click Connect.
3. Enter “freespot” as the password and click Join.

### Mac

1. Click the Wi-Fi icon in the menu bar.
2. Select “freespot=Security Password(AES)”.
3. Enter “freespot” as the password and click Join.

Once you are successfully connected to FREESPOT, a web browser will launch automatically.

---

Follow the instruction on the backside and register your device.
Register Your Device

After you successfully connected to FREESPOT and a web browser is opened, register your device by following the procedure below.

1. Follow the instructions on the screen. After reading the displayed terms of use, select Agree.

   If the “Thank you for using FREESPOT.” screen does not appear, access the URL.

   [QR code]

   http://www.freespot.com/

A. Register Using Your Email Address

2. Select “Email Account” and enter an email address that can receive emails immediately.

   Authentication Method
   ○ Email Account
   ○ SNS Account Authentication
   ○ Guest Account (Accessible for 10 minutes)

   If you don’t have an email address to receive emails, you cannot use “Email Account”. Select “SNS Account Authentication” or “Guest Account” instead.

   Email Address
   [Enter an email address that can receive emails immediately, such as your mobile device’s email address. After you have received the email, follow instructions in the email to complete your registration.]

   Submit

3. You will receive an email. Follow the instructions in the email.

   After the process is finished and you successfully sign in to FREESPOT, Internet access will become available.

B. Register Using Your SNS Account

If this method cannot be used, use procedure A to register instead.

2. Select “SNS Account Authentication” and select the SNS you use.

   Authentication Method
   ○ Email Account
   ○ SNS Account Authentication
   ○ Guest Account (Accessible for 10 minutes)

   If you don’t have an email address to receive emails, you cannot use “Email Account”. Select “SNS Account Authentication” or “Guest Account” instead.

   [Sign in with Facebook]
   [Sign in with Google]
   [Sign in with Twitter]
   [Sign in with Yahoo]

   Submit

3. Follow the instructions on the screen and log in to the SNS.

4. After the process is finished and you successfully sign in to FREESPOT, Internet access will become available.

Next Time
Once you sign in to FREESPOT using your email or logging in to an SNS, the device you registered can access the Internet without any registration until the sign in expires.

Sign in will remain valid for 6 months.
If 6 months pass from your last access and the sign in expires, register again using the procedure above.

No configuration required for Nintendo Switch™ and Nintendo 3DS series.
These series can connect to FREESPOT automatically and access the Internet without any registration.
*For certain FREESPOT hubs, registration might be required.
*Nintendo Switch and Nintendo 3DS are trademarks of Nintendo.
